## 116 Pool Beading System

### Easily places pool beading

The 116 Pool Beading System is used to weld pool beading to the sidewalls of pools faster than any other option in the industry. The 116 Pool Beading can be easily set up to weld beading to the top or bottom of either side of the sidewall.

116 Pool Beading Seam Types:

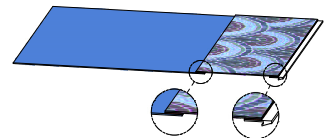

## 118 Custom Sidewall Construction

### Apply bead and decorative panel to sidewall

This 118 Custom Sidewall Construction is customized to meet your pool configuration. It has been developed so you can now weld the pool wall to any pool border and apply the beading at the same time.

118 Custom Sidewall Seam Types:

## m.100

### Weld multiple layers simultaneously

The M100 for pool covers is a fully automated system for producing pool covers. It will weld multiple panels together and is completely customizable. Once welded, pool covers can be cut to length reducing material handling and increasing production

M100 Pool Cover Seam Types:
