## Plate transfer / fusing machine

This little magnetic tenser / fusing machine allow to fuse jacket Parts and sportswears, it allow also to make transfer and sublimation. This machine doesn't need air comprimed.

### The Control Unit

Respect of fusing parameters is the most important part of the process, EMS 120 fusing machine control panel includes:

- Set/Actual temperature
- On/Off button
- Pressure indicator
- Pressure regulator
- Fusing time in seconds
- Double safety starting button

### Heating System

EMS 120 Series has an aluminium heating plate 20 mm tick with 3 snake heating element inside.

### The heating Element

Nichel/Chrome

### The Pressure System

Ems 120 has a magnetic pressure system. The pressure can reach 1 Kg. Sq/cm

#### E.M.S. 120 Technical Data

Model	Useful press area Mm (inch)	Working Plate	Air Pressure Volume Ø=8 mm	Electrical Volt/Hz/Kw	Dimensions: LxWxH Mm (inch)	Weight Kg (lb)	Air Consumption l/min
