

Automate your production... Accelerate your profits!

MODULINE BILLBOARD FINISHING

Finish all 4 sides of billboard or bulletin

This automated system is capable of finishing all four sides of your billboards with current poster board in 2 minutes or less! This system can also finish large 14ft x 48ft billboards

AES1800

Automated roll to ship finishing system

The Automated Edge Seaming AES1800 is designed to automatically finish your rolled products. It will weld, grommet and cut your products eliminating excessive labor. The bottleneck of your work flow no longer has to be your finishing operation.

AES1900

All-in-one finishing solution

It will quickly and efficiently finish products reducing your finishing bottlenecks. The AES1900 is designed with the capability to weld and grommet single panels or produce product off roll. Will weld and grommet 3x5 banners every 30 seconds
