# MB9018A

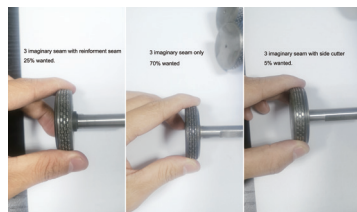

# MB9018B

**LACE MACHINE for protetion suit side seam jointing** . This unit perfectly works on disposable medical gown operation. By this IMB special made machine, operator can easily run machine with high efficiency .

## HIGHLIGHTS

1. Double motor speed adjustment
2. Horn rotations compatible with the sealing roller
3. Pneumatic roller lifting system
4. Suitable for variety of roller patterns(Machine equipped with one three discontinuous seam roller only , others optional)
5. Built-in PC chips and multi-circuit ultrasonic protection system ensuring the machine running quite durably and safely
6. Touch screen, Digital signal control , real-time frequency monitoring system, no ultrasonic wave break /disappearing issue .
7. Pedal controlled , sewing speed controlled by pedal pressure, which makes machine operation feeling same as normal sewing machine ,by this way it's very friendly for operator use.

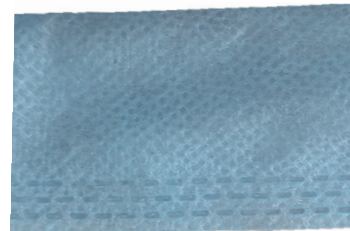

## PRODUCTIVITY

**Average production:**  
700-800 pcs/ 10 hours

## TECHNICAL DETAILS

- Sewing head details: IMB HEAD
- Running speed: 0-80meter/ min
- Output power: 1500-2500W
- Frequency : 20KHZ
- Power supply:  
220 Volt, mono-phase 50/60 Hz  
Size and weight of the machine:  
1270\*620\*1320mm (L\*W\*H) – 120Kg

## EXAMPLES OF USE

attach demo

## COMPARISION

MB9018A is driven by single motor, can only work on straight seam sewing .

MB9018B is driven by double motor,can work on both armhole seam and straight seam sewing.

## Roller types of MB9018A & MB9018B
