PS400

The Fastest BAG CLOSER

The PS400 is the fastest packaging bagging machine used for an efficient and streamlined bag closing system. This bag closing machine can be easily integrated into an automated bag closing line and/or a manual feed system sealing bags with a pinch or a double-fold seal.

PS400

Seal Types:
Pinch Closure & Double Fold Closure

Technical Specification

Voltage:	230 Volts - Three Phase - 40 Amp. 480 Volts - Three Phase - 25 Amp.
Air Requirements:	20cfm @ 90psi
Power Consumption:	Approx. 9kW
Maximum Temperature:	788°C (1,450°F)
Dimensions:	Width: 1.34m (53") Length: 3.1m (120") Height: 2.26m (89")
Weight:	1,140kg (2,500 lbs)
Seam Width:	25-64mm (1-2.5")
Welding Cycle:	Up to 35 bags per minute

Features and Benefits

- Digitally controlled for quick production start up
- Servo controlled enabling synchronization with converting line
- Precision folding system for clean- straight folds
- Recipe management system for easy recall of different batches
- Quick change folding system for size and type of fold
- No glue, adhesives or hot melt
