

# O-ZONE

STATIC CABINET FOR DISCOLORATION EFFECTS WITH OZONE

## DESCRIPTION

**O-Zone is the static cabinet by Tonello that allows, using only ozone, to obtain unique and customizable aesthetic effects, such as localized discoloration and lightening.**

The process is flexible, fast, safe and fully controllable by a touch screen that allows you to easily set all the desired parameters.

O-Zone is designed for small productions and is ideal for doing experiments and research directly on the garment, quickly verifying the result.

## TECHNICAL FEATURES

[REQUEST INFORMATIONS →](#)

## ALL THE ADVANTAGES OF O-ZONE:

- **New, amazing aesthetics** such as PP effects, dégradé, sun-faded looks
- Flexible, fast, safe process that can be fully controlled by a touch screen
- Designed for small productions and **ideal for doing experiments and research** directly on the garment
- Developed in collaboration with [Candiani Denim](#), "The Greenest Mill in the Blue World"

# ACCORDING TO ALBERTO RIGO, LAUNDRY MANAGER OF CANDIANI DENIM:

*“Tonello new O-Zone cabinet is the perfect demonstration on how research and collaboration between leading companies can result in true innovation, always driven by sustainability.*

*As Candiani Denim garment R&D department, we had the pleasure of collaboration on the birth, developing and tuning of this new technology. Results are simply amazing, it's a success achieved thanks to a shared vision, shared philosophy, and natural complementarity between our two companies.*

*We can say without any doubt that we opened the path to a new way ozone can be applied. In fact, O-Zone allows us to get completely new and sustainable washing effects and discolorations.*

*This project represent present and future of our philosophy and it will be a huge evolution of denim treatment.”*
